Each course requiring or instituting a laboratory fee will utilize an Analysis of Instructional Course/Lab fees worksheet (see attached) to establish the appropriate laboratory fee for the course. The Analysis of fees will include:

a) developing a rationale of need for each consumable material and/or supply.

b) a list of each consumable educational material and estimated expense expected for the course.

c) the establishment of the associated cost per student by using the following formula: Total cost of supplies needed divided by the number of students in the course = cost per student (shown on the attached worksheet).

Each department establishes the need for fees based upon supply/equipment costs. The department will complete an Analysis of Instructional Course/Lab fees worksheet for courses requiring laboratory fees.

The proposed fee is presented to the Program Facilitator for approval.

The proposed fee is presented to the Dean (responsible for the requesting department) for approval.

The proposed fee is presented to the Chief Academic Officer for approval.

The proposed fee is presented to the President for approval and presentation to the Board of Trustees for annual approval.

Should it become necessary to change an established fee, the recommended fee would follow the above procedures.
