PURPOSE
This procedure establishes guidelines for the inspection of College facilities that are going to be used for a presentation or an event that will be open to the public or leased by independent groups. Consult the CF Safety Management Manual for further information.

PROCEDURE
The College should periodically inspect College buildings that are open to the public or leased by independent groups. The Safety Technician or other College representative will inspect the premises, review plans and prepare a safety inspection report for the building. Any safety concerns noted as a result of the inspection will be reviewed with the responsible organization and must be resolved before the event can begin. If a safety concern is noted at an event in progress, the concern must be addressed immediately or the event may be stopped and the doors to the building locked.

INSPECTION SCHEDULE
To ensure compliance with all safety regulations, the Safety Technician will randomly conduct unannounced inspections of all College facilities.

VIOLATIONS
If a safety violation is found, the Safety Technician will issue a safety citation to the individual in charge of the facility or event. A copy of the citation will be forwarded to the appropriate department head. If a second violation is issued, the Senior Vice President of Administration and Finance will be notified and further disciplinary action may be taken.

RECORDKEEPING
1. Accidents must be adequately recorded and reported through proper channels.
2. Accidents should be analyzed to determine proper corrective action.
RESPONSIBILITY

It is the responsibility of the lessee or responsible organization to ensure compliance with all State of Florida Statutes. Any questions may be addressed to the CF Safety Technician.
