II. Course Description

This course is designed as a foundational course for those students who must take additional mathematics in their chosen majors and do not yet have an appropriate background. The emphasis is the study of mathematics from a functional perspective—including linear, quadratic, rational, absolute value, radical, exponential and logarithmic functions. Systems of equations and inequalities and applications such as curve fitting, mathematical modeling, optimization and exponential growth and decay are included.

Class Attendance: Attendance, punctuality, and class participation are all expected at the college level. Class attendance will be recorded. Regular attendance and being on time are a requirement for this course. The student is responsible for all information /material /assignments covered in class. Attendance is required for all tests. Students who are absent for more than two classes may be dropped from the course. However, non-attendance does not constitute withdrawal from this course. It's the student's responsibility to complete the withdrawal forms by the appropriate date

Required:	MYMATHLAB/access code	Optional Materials (Text):	College Algebra graphs and models
ISBN #:		Author of Text:	BITTENDER, BEECHER, ELLENBOGEN, PENNA
Required Materials:	MYMATHLAB access code and Scientific Calculator (Texas Instrument TI-30XS Multiview preferred)		

III. Student Learning Outcomes/Course Objectives

Learning Outcome	Quiz	Exam	Project	Classroom Activity
Quantitative and Analytical Reasoning: The student will understand and apply mathematical and scientific principles and methods.				
1. Perform accurate computations using order of operations with and without technology.	X	X		X
2. Identify and organize relevant information and complete the solution of an applied problem.	X	X		X
3. Interpret and communicate understanding of visual representations of data.	X	X		X
4. Demonstrate mathematical number sense and unit sense.	X	X		X

IV. Assessment**HOW THE COURSE WORKS:**

- Homework:** Homework will be assigned for each section covered. Access homework problems and MML assignments using MyMathLab software. You can do the homework and MML assignments as many times as you want; just click “similar problem “. If you do the homework you will be well prepared for the tests. The assignments have due dates posted in MyMathLab. **DO NOT MISS THE ASSIGNMENT DEADLINES!!!!**
- Quizzes. There will be 3 online quizzes given in MML. See the schedule below for due dates.
- Test will be taken in class.** Dates for tests are listed in the schedule below.
 - TEST #1 –covers chapter 1
 - TEST #2- covers chapter 2
 - TEST #3-covers chapter 3
 - TEST #4 – Final Exam

Assignments are weighted as follows:

Homework (online in MML)	10%
Quizzes	10%
In class Tests	80%

Grades: The final grade will be calculated based upon your performance on the above assignments. The following system will be used for the final grade:

A – 90 – 100%	B+ - 89 – 87 %	B – 80 – 86 %	C+ - 79 – 77%
C – 70 – 76%	D – 60 – 69%	F – 0 – 59%	
FF – Failure due to academic integrity issues			

Make-up policy if needed: If you miss a test the final exam will replace that missing test

V. Course Schedule/Outline**MAC1105 Course Outline**
