

Elementary Statistics

Syllabus Fall 2022

August 15 – December 8

I. Course Information

Course Title: Elementary Statistics
Course No. & Section: STA2023-41
Credit Hours: 3

Meeting Dates: TH 12:30-1:45
Course Location: 3-201
Meeting Dates: 8/15/22-12/8/22

Instructor Name: Mrs. McRae
Office Location: Room 3-208-H
Office Hours: MW 1-3:30pm Virtual;
TH 9-11am/3:15-4:15pm Rm 208H

Telephone No: (352) 746-6721 ext 6128
Email: mcraek@cf.edu
Please use Canvas Inbox

Extended Emergency Closure

“For emergency campus closings (natural disasters, etc.) call 352-291-4499 or 800-831-9244 or check our website (CF.edu).”

II. Course Description

This lecture course provides the study of descriptive statistics, probability theory, random variables, hypothesis testing, confidence intervals, correlation, simple linear regression and nonparametric statistics. It is expected that students attend all lectures during meeting dates and times. Students will be required to show proficiency in interpreting and relating a set of data or circumstances to a definition, equation or mathematical concept. This course fulfills the requirement for a college level mathematics course. Gordon Rule applies.

Textbook: Elementary Statistics
Author: Triola
Edition: 14th

ISBN No.: 8220123161095
Required Material: MyMathLab
access code and a Graphing
Calculator, TI-84 plus

You do not need to buy a hard copy of the book. The textbook is online on the MyMathLab website. When you buy your access code you will have access to the textbook online.

III. Student Learning Outcomes/Course Objectives

The following list offers students a consistent way to see how CF's global learning outcomes are assessed in each class. This is for information purposes only and does not change the grading system used in this class. Only those learning outcomes relevant to this course are included below.

Learning Outcome	Quiz	Exam
Quantitative and Analytical Reasoning: The student will understand and apply mathematical and scientific principles and methods.		
1. Perform accurate computations using order of operations with and without technology.	X	X
2. Identify and organize relevant information and complete the solution of an applied problem.	X	X
3. Interpret and communicate understanding of visual representations of data.	X	X
4. Demonstrate mathematical number sense and unit sense.	X	X

IV. Assessment

Attendance: Each student is required to attend all class meetings. Attendance is required for all tests and **there will be NO make-up tests**. Non-attendance/participation does not constitute withdrawal from this course. It is the student's responsibility to complete the withdrawal forms by the appropriate date (Attendance accounts for 5% of Final Grade.).

Grading Information: Homework, quizzes and tests will be assigned online. They must be completed by the due date.

1. During class we will discuss each section. Students are expected to take notes (Guided notes are provided in Canvas. You may download from Canvas and print.) and then read each section as needed. There are practice problems at the end of each section (the answers to the odd problems are worked out in the Student Solutions Manual) as well as online.

2. Each section will have assigned homework problems. The graded homework problems are online and will be checked as you finish each problem. You can use

the help on MyMathLab to do these problems. If you get a problem wrong you can try a similar problem and work until you get that problem type correct. You can retry homework problems until the due date and there are additional practice problems available in the online text book. Your lowest homework score will be dropped at the end of the semester.

3. There will be at least one online quiz for each chapter. The quiz problems will be similar to homework problems. You will not have the help buttons available when taking a quiz. You will have two attempts at each quiz; the better of the two scores will count towards your grade. The quiz must be completed before the questions are graded. If you use the second attempt you will need to do the whole quiz over, not just one particular problem. The problems will be similar but probably not exactly the same. Each quiz must be completed by the due date. Your lowest quiz score will be dropped at the end of the semester.

4. There will be five online tests. You must take your tests in the designated testing lab during our regularly scheduled assessment dates. Test questions will be similar to those you have worked on for homework and quizzes and lecture notes. **If you are caught cheating, your grade on the test will be a 0.** Your lowest of these five tests will be dropped at the end of the semester.

5. There will be a comprehensive online final exam in the designated testing lab on the date of your scheduled final. The exam will include questions from each of your previous tests. Your five test reviews will serve as your final exam review, so you will know the topics that will be covered on the exam. This exam is required and cannot be your dropped test.

Tests	70%
Quizzes	15%
Homework	15%

Grading scale (see current catalog):

A	90%-100%
B+	87%-89%
B	80%-86%
C+	77%-79%
C	70%-76%
D	60%-69%
F	Below 60%

Make-up policy: No make-up work will be given unless there is an emergency or prior approval has been given by the instructor. In such an event, you must notify your professor **before** the exam or item is due unless the emergency prohibits it and you may be asked to bring proof of the emergency. A make-up exam must be taken within one week of the original exam date unless the emergency prohibits it. While you do not need to disclose personal details, let your professor know as soon as possible if something is preventing you from participating online or completing work.

Proctoring: In order to verify student identity on assessments, this course requires proctored assessments. All assessments are proctored online. We will meet as a class in the designated testing lab on our regularly scheduled assessment days.

V. Course Schedule Outline

Stats 2023-41 TH 12:30PM

Week	Dates	Section	Activities	Due Date
Week 1	8/16	1.1	Statistical & Critical Thinking	8/25
	8/18	1.2 1.3	Types of Data Collecting Sample Data Chapter 1 Quiz Order of Operations Quiz	8/25
Week 2	8/23		Review	
	8/25		Test Chapter 1	8/25
Week 3	8/30	2.1	Frequency Distributions	9/15
	9/1	2.2 2.3	Histograms Other Graphs	9/15
Week 4	9/6	2.3 2.4	Other Graphs Scatterplots Chapter 2 Quiz Number Sense Quiz	9/15
	9/8	10.1	Correlation and Regression Chapter 10 Quiz	9/15
Week 5	9/13		Review	
	9/15		Test Chapters 2 and 10	9/15
Week 6	9/20	3.1 3.2	Measures of Center Measures of Variation	10/11
	9/22	3.2 3.3	Measures of Variation Boxplots Chapter 3 Quiz	10/11
Week 7	9/27	4.1 4.2	Probability Addition & Multiplication Rules	10/11
	9/29	4.3 4.4	Conditional Probability Counting Chapter 4 Quiz Visual Representation of Data Quiz	10/11
Week 8	10/4		Professional Development	
	10/6		Review	
Week 9	10/11		Test Chapters 3 and 4	10/11
	10/13	5.1 5.2	Probability Distributions Binomial Probability	11/1
Week 10	10/18	5.2 5.3	Binomial Probability Poisson Probability Chapter 5 Quiz	11/1

	10/20	6.1 6.2	Normal Distribution Normal Distribution Applications	11/1
Week 11	10/25	6.4 6.6	Central Limit Theorem Normal as Approximation to Binomial Chapter 6 Quiz Problem Solving Quiz	11/1
	10/27		Review	
Week 12	11/1		Test Chapters 5 and 6	11/1
	11/3	7.1	Confidence Interval for Population Proportion	11/29
Week 13	11/8	7.2	Confidence Interval for Mean Chapter 7 Quiz	11/29
		8.1	Hypothesis Testing	
	11/10	8.1	Hypothesis Testing	11/29
	11/11		Veteran's Day Holiday	
Week 14	11/15	8.2 8.3	Test a Claim About a Proportion Test a Claim About a Mean Chapter 8 Quiz	11/29
	11/17		Review	11/29
Week 15	11/22			
	11/23-27		Thanksgiving Break	
Week 16	11/29		Test Chapters 7 and 8	11/29
	12/1		Exam Review	
Exam Week	12/8		Final Exam 12:30pm	12/8

STATEMENT: Due to unforeseen happenings, it may be necessary for the course assignment schedule to be altered. The instructor will always strive to be fair about any changes.

The College of Central Florida is committed to helping you succeed and achieve your academic, personal and career goals. There are a wide range of resources and support services available to you. When students are connected early to resources and support systems on campus, they are more likely to stay in classes, perform better in those classes, and complete their path more quickly. One example is through an Early Support Program, where you may receive an email indicating your professor or advisor is reaching out directly to help connect you to support services. This may include

connecting you to tutoring, financial support, psychological support services, and disability services just to name a few. Be aware, you can also reach out to these services on your own as well. Additionally, we offer disability services, a testing center, and many other resources which are all available to you. Please refer to the College Resources, Dates, and Policies document in your Canvas course to learn more about these supports.
