Installation Process

Click on the **Settings** icon → **Office 365 Settings** → **Software** → **Lync**

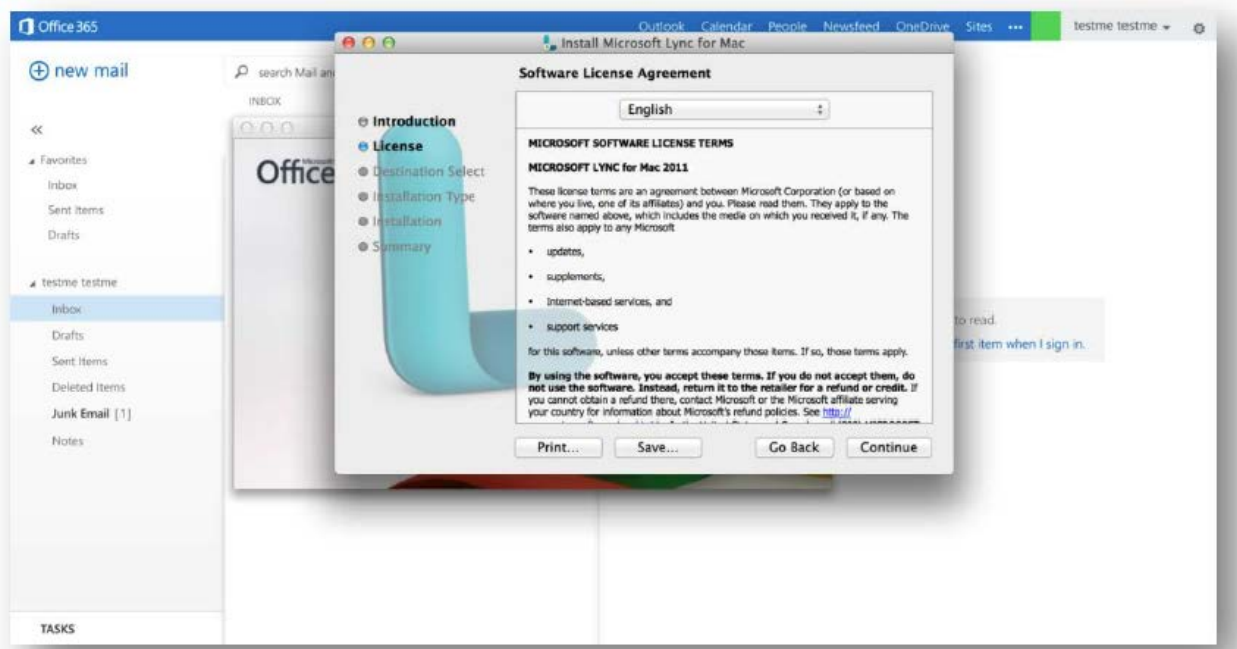

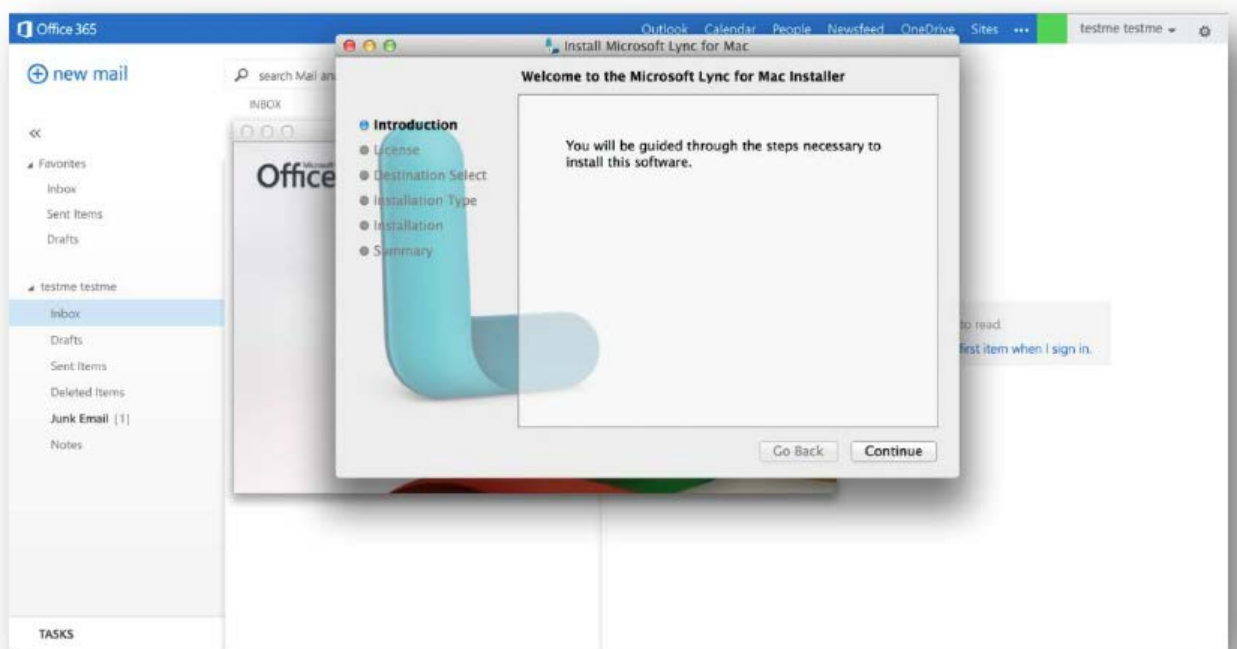

Click **Install**.

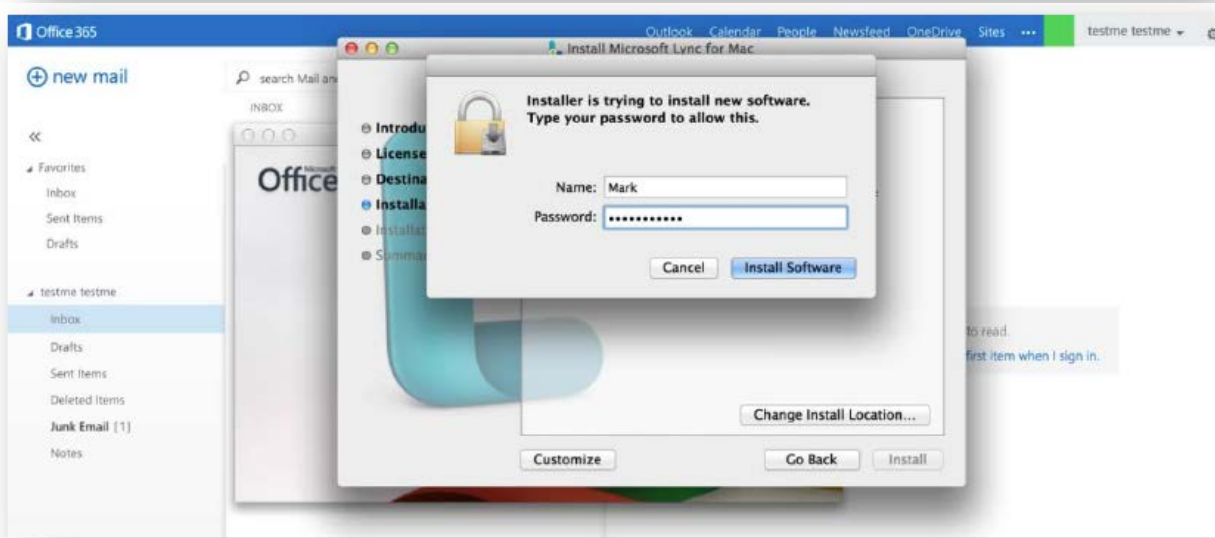

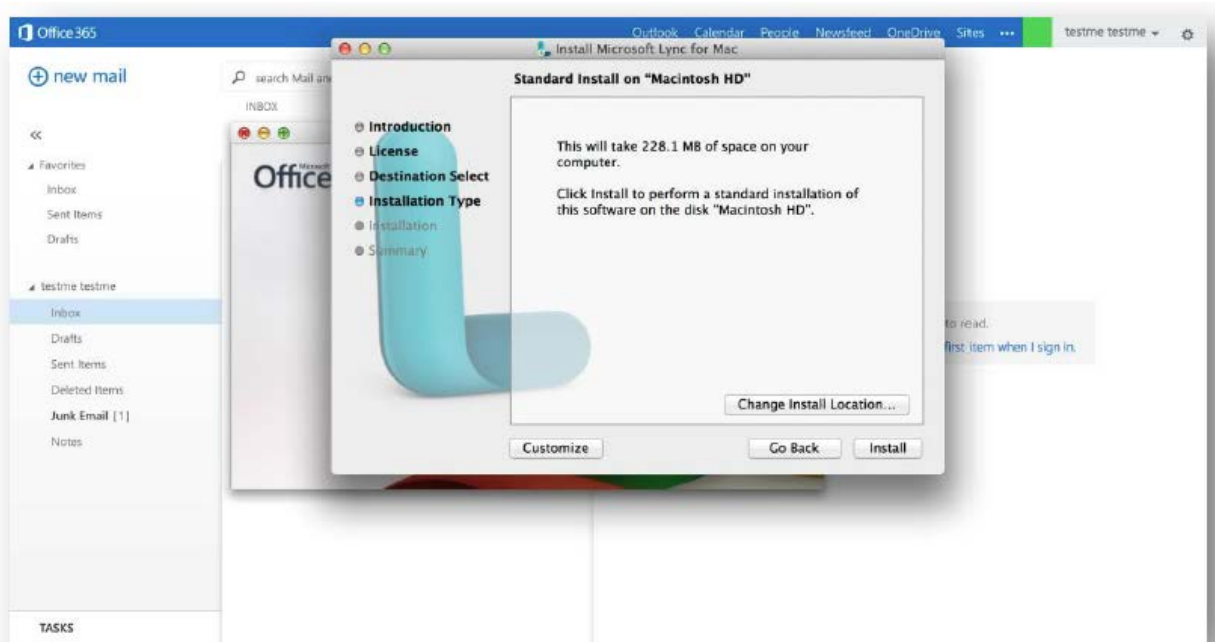

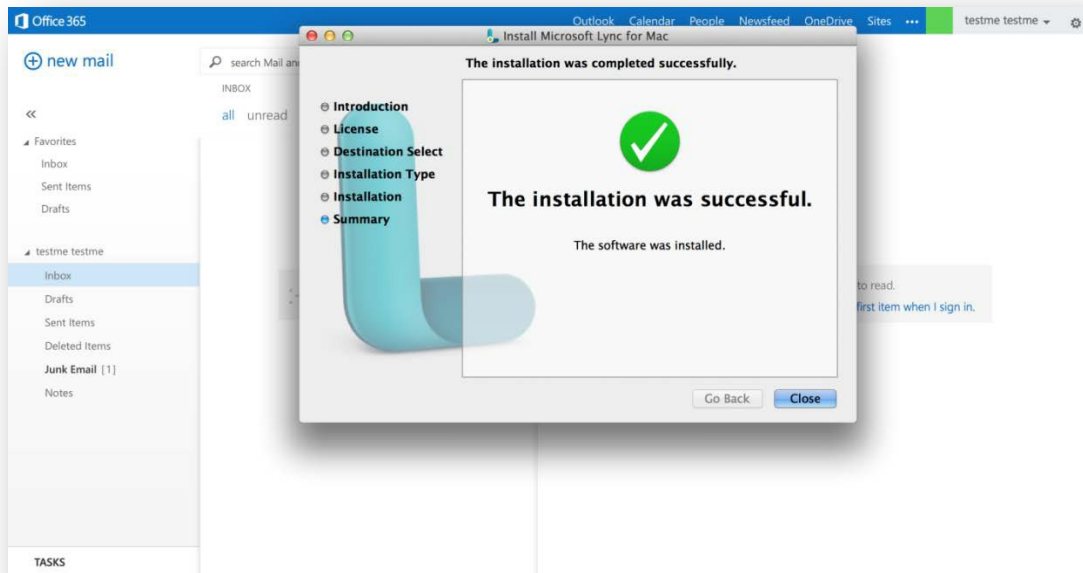

Double-click on the **Lync Installer** download arrow.

You will be guided through the rest of the installation process.

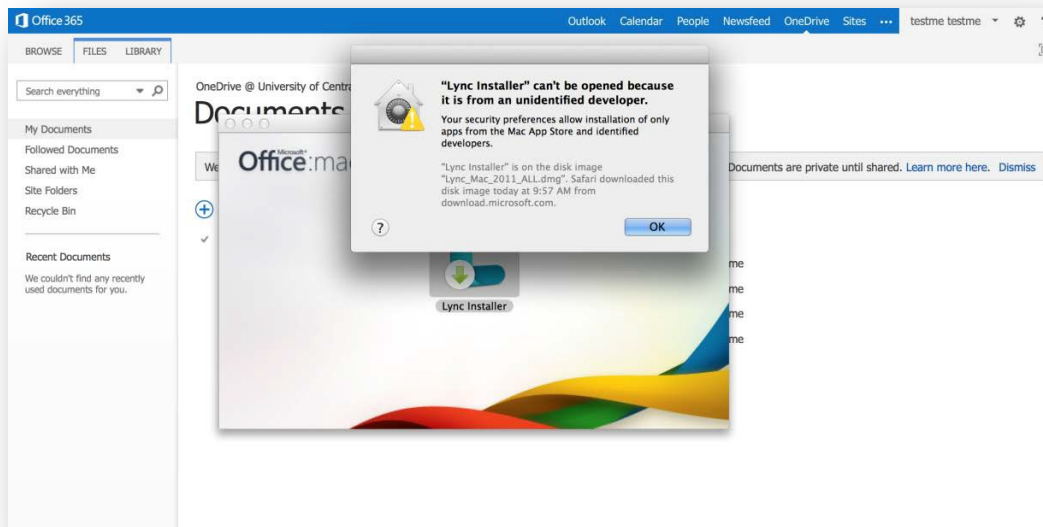

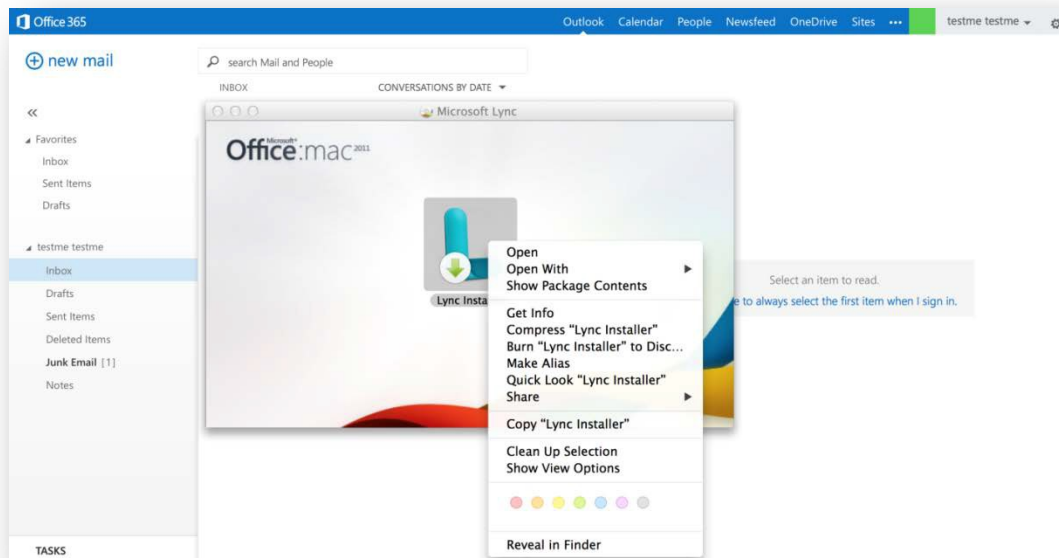

Installation Error

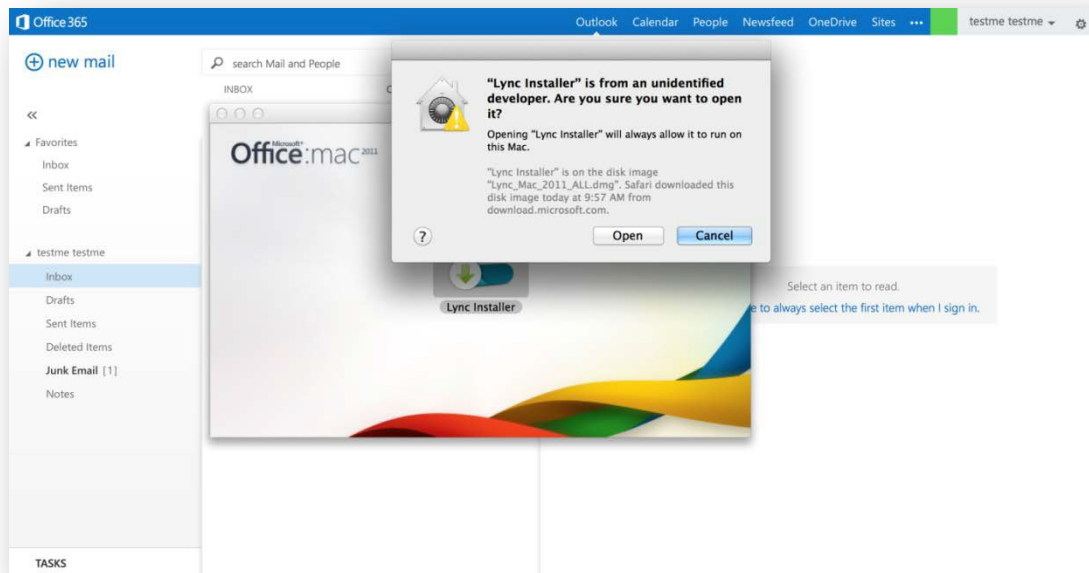

When installing Lync on your Mac, you may have an issue opening the Lync Installer to begin the process. An error like this one may alert you after attempting to open the Installer.

To fix this issue, Control-Click (or right click) the Lync Installer.

Then click **Open**.

Lync Installer should open and then guide you through the installation process.
